Mr. Brian Jankauskas
New York State Department of
Environmental Conservation
Division of Environmental Remediation
625 Broadway -12th Floor
Albany, New York 12233

Dear Ms. Hartzell and Mr. Jankauskas:

SUBJECT: BROOKHAVEN NATIONAL LABORATORY (BNL) PHASE 4 WORK PLAN
FOR CHARACTERIZATION OF PER- AND POLYFLUOROALKYL
SUBSTANCES (PFAS)

Attached for your review is a copy of the Phase 4 Work Plan for continued characterization of PFAS and 1,4-dioxane at BNL. The goal of the Phase 4 monitoring effort is to expand upon previous emerging contaminant studies by conducting a comprehensive baseline characterization of PFAS and 1,4-dioxane concentrations in: 1) approximately 350 on-site and off-site groundwater monitoring wells; 2) twenty-seven off-site extraction wells; and 3) influent and effluent samples from five off-site groundwater treatment systems.

If you have any questions please contact Jerry Granzen, of my staff, at (631) 344-4089.

Sincerely,

Robert P. Gordon
Site Manager
